

KEANES POINT **PLAYGROUND UPGRADE**

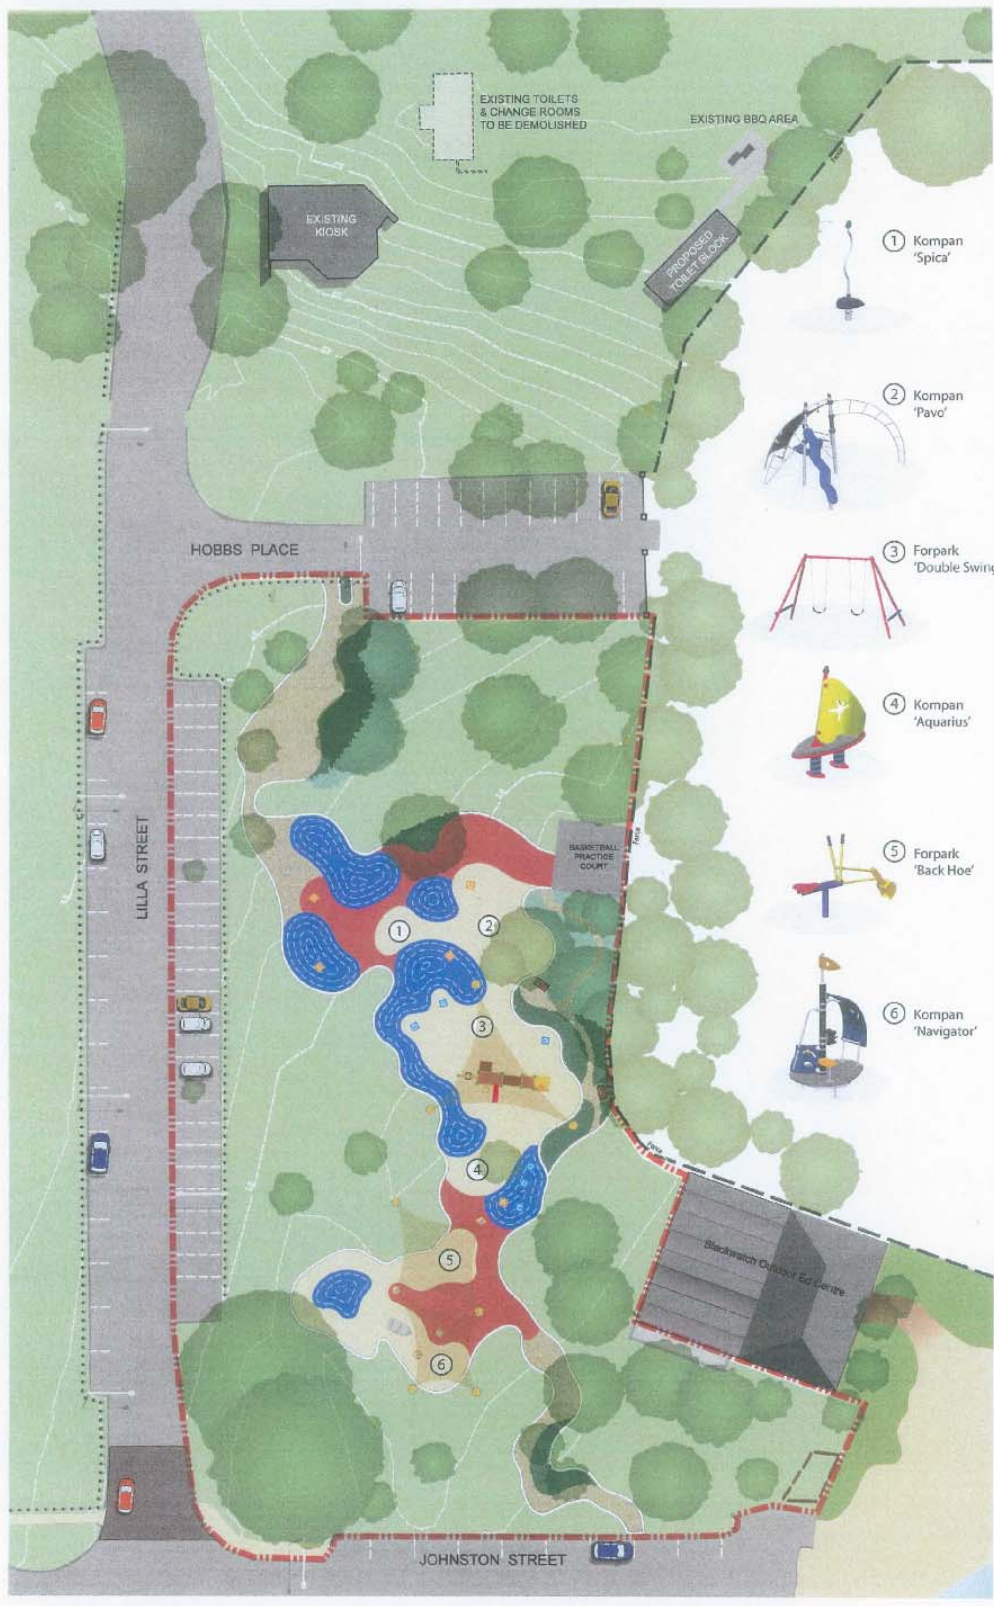

The Shire of Peppermint Grove has commissioned Ecoscape to produce a concept plan for the redevelopment of the Keanes Point playground.

The proposal includes -

- the playground being shaped like the Swan River
- retention of the shade sails
- provisions for some new playground equipment and refurbishment of some of the existing equipment
- two sailing courses complete with market buoys will be marked out within the river shaped playground
- areas of coloured synthetic turf with specific areas having soft fall underlay
- large areas of sand for soft fall areas
- a wide concrete flat mowing strip around the playground which will allow geographic reference points along the river to be marked in the appropriate places on the concrete mowing strip
- some new planting of shore and river type plants in the grassed sections
- use of stabilised gravel pathways at the northern and southern ends of the playground area

Provision will also be made for future stages of development.

Your comments on the concept are welcome.
